THE REGULATION OF INDUSTRY.

Intro.

Our industrial expansion since Civil War.

The principle ind. virtue-"increased output."
blackest ind. crime-"limitation of production."
Industrial fetisch-"OUTPUT"

Not Production, but Distribution the crux of the industrial problem.

The unequal distribution of the profits of industry the cause of all modern industrial warfare.

The struggle of organized labor to secure a greater share by means of
collective bargaining
closed shop, minimum wage, strike,
and boycott.

The present economic order makes it impossible for everybody to keep the commandments.

HOW CAN WE SO CONTROL INDUSTRY AS TO GIVE EVERY MAN A FAIR CHANCE TO LIVE TO THE FULL OF HIS POWERS AND TO THE BEST THAT IS IN HIM?

The change in the ideal here.
The change in the idea of what it means to live.

I. <u>The regulation of industry by government control.</u>

1. Society should see to it that a living wage is paid in every industry; and where it cannot be paid with profit the industry should be condemned as superfluous and intolerable.
2. This can only be done thru some form of go governmental control.
   The interestate Commerce Commission
   An Inter-State Labor Commission.

II. <u>The regulation of Industry by the Christ Spirit</u>

Business a form of social service.
Why not have knights of industrial chivalry? Sir Galahads of industry?

"LIVE AND LET LIVE""

change to

"Live and help live".
